- A) Can you please share a link to the May 2015 indoor air testing report? Apple told me the Dec 2015 report included the May 2015 data and there was no separate May 2015 report. That didn't sound right and I've been trying to track down the detailed May report.
- B) Can you confirm if the May 2015 testing was only 8hrs in duration like the Dec 2015 testing was? Was there any 24hr+ Summa testing ever performed in the TRW building that passed the EPA indoor air thresholds?
- C) I see ethylbenzene and toluene noted as related chemicals for TRW in earlier EPA reports (copy inline). Did you mean to say they're not "contaminants of concern?" Does it change your analysis knowing they have been known to be part of the historical contamination?
